⚙ SKILLS

LANGUAGES
JAVASCRIPT, HTML, CSS

DATABASE
MONGODB, NOSQL

FRAMEWORKS
REACTJS, EXPRESSJS, NODEJS, MONGODB, TAILWIND CSS, BOOTSTRAP, REDUX, AXIOS, MERN Stack, THREEJS, Socketio

📓 PERSONAL PROJECTS

Socioll (Sociol Media App) [**Live**]   [**Github**]

- I engineered a robust full-stack social media application, seamlessly integrating features from LinkedIn and Instagram. Users can share photos and posts, as well as follow and connect with their friends, creating a user experience reminiscent of Facebook.
- This fabulous application seamlessly integrates the robust MERN (MongoDB, Express.js, React.js, Node.js) stack, along with JSON Web Token, Redux, React Router Dom, React Awesome Reveal, Tailwind CSS, Firebase storage, Axios, and Material UI.

Photo Ki Dukan (Photo Repository App) [**Live**]   [**Github**]

- This app hosts a diverse collection of photos, offering users the ability to discover any image they desire. Whether you're searching for specific themes, or subjects, or simply exploring, the app ensures a comprehensive and easily navigable repository of photos.
- Designed with precision, this app seamlessly merges the powerful Supabase with React.js, Redux, React Awesome Reveal, Infinite Scrolling component, Tailwind CSS, Axios, and Emotion.

Backend for Social Media App (Backend App) [**Github**]

- It is a refined backend application tailored for a social media platform, equipped with all the essential routes necessary for creating any robust social media application.
- Precisely designed, this application seamlessly combines Node.js, Express.js, MongoDB, JSON Web Token, Bcrypt.js, Express Validator, and Mongoose for optimal performance and security.

CHATTILA (Real-time chatting App) [**Live**]   [**Github**] *Currently working*

- I engineered a full-stack chatting application Chattila, implementing the features from WhatsApp and alongside unique functionalities I designed. Implemented features enabling users to send messages to their friends and family in real-time, ensuring seamless and instant communication using Socketio.
- I crafted this Chatting application by harnessing the capabilities of the MERN (MongoDB, Express.js, React.js, Node.js) stack, Socketio, React Router Dom, Tailwind CSS, and Axios technologies.

Big Cart   (E-commerce App) [**Live**]   [**Github**]

- Developed and executed a comprehensive full-stack e-commerce application, integrating key features for an optimal shopping experience. Orchestrated a seamless checkout flow and implemented a secure payment gateway, guaranteeing all necessary functionalities for an e-commerce app are systematically invoked.
- I crafted this exceptional e-commerce app, harnessing the power of cutting-edge technologies, including React.js, Tailwind CSS, Emotion, Headlessui, React Router Dom, and Firebase.

🎓 EDUCATION

B.S.C COMPUTER SCIENCE   2021-2024

SURYA SEN COLLEGE (NORTH BENGAL UNIVERSITY), SILIGURI
